- Multiple companies sharing resources such as SharePoint. How to properly control and document.
- What are the CMMC requirements around sharing data with other companies that fall under the same parent company?
- There was a subtle change in the Level 2 from version 1 to the latest version for CRMA assets.
  - The original version required us to secure CRMAs to our risk-based policies and the new version can be interpreted to say that CRMAs need to meet the NIST 800-171 controls.
  - How do you interpret the requirements for CRMA in the latest rule and do you think they will stay the same as comments are adjudicated?
- Does the DoD have any programs/plans/suggestions as to how small to medium sized businesses are expected to cover cost of CMMC prep and then Assessment? Thank you!
- MFA, Collaboration tools like Teams and Zoom.
- How best to identify CUI Categories in Contract Clauses and Flow Downs, even when the contract officer gets in wrong.
